

A core component of every OEM manufacturer / Distributor is dealing with warranty claims from Dealers / End Users. Following paper trails, checking claims, and ensuring the validity of parts, labor, and pricing, is a very long, tedious task that is both expensive, and extremely time-consuming.

Save your time and money, and join the online real-time revolution that the Simply Warranty program provides. Simply Warranty is an online claims and inventory management system that focuses on automating the submissions and processing of claims in real-time.

It is TREAD compliant, meets all criteria for a true Warranty Recall Notification System. It is at home in Canada, USA, or Globally with Titling or NVIS registration systemization and is offered in both French and English versions.

It tracks and controls all data while providing ease of export via CSV exports / reports. While tracking ownership changes may be proving to be invaluable from a marketing perspective, it provides CRM capabilities for those wishing to stay in touch with every customer who has purchased their products.

Automated Warranty Submission and processing is no longer an expensive luxury affordable only to fortune 500 Companies. Simply Warranty can be customized to meet the modular demands specific to your own in-house requirements

Automating Your Warranty Process Saves You Time, Money, And Increases Your Bottom Line!

We all know that warranty costs you money, having the right system in place makes all the difference for everyone. If you want to remain competitive you must have an online version to assist in all facets of the process. What Can An Effective Warranty Management System Do For You?

Getting the right tools to do the right job is mission critical for any business, making sure that key criteria and an understanding of your business practices are followed - is where we come in!

With an effective warranty management system, then projecting and managing warranty costs becomes simple. Production can make changes during manufacturing to react to issues in the field. Costs can be controlled, defects can be addressed immediately to avoid massive recalls, and you can see the financial impacts to your bottom line – instantly.

With the advent of technology the challenge sometimes become the learning curve both in-house and at the dealer level to work within such new environments. Simply Warranty was developed to meet the needs of OEM's at all levels of design. It is simple to use, easy to understand, yet robust and tested in the field with thousands dealers using it everyday! We learned from their experiences and this will benefit you immensely upon deployment! No time down, no “white knuckle” challenges expected.

The system is extremely fast, automated by logic. Log in – and use it as opposed to being challenged each and every time. Understand the impact of sales cycles, ensuring your dealers shelves are kept stocked, in both their parts departments and showrooms at all times with the minimum requirements, will enhance your end-users experience – This is what everyone dreams about having – The Right Tools and Results!

Stop invalid and duplicate claims from happening instantly. With the right system quality and production issues are dealt with in real-time – not after the fact! Claims processing become part of the dealer's routine. The most important person is on the line – The customer. Getting your customer serviced and out the door is mission critical. Simply Warranty gives you the power to make this happen.

How can Simply Warranty benefit my business – Today and Tomorrow and beyond?

Simply Warranty is not the new kid in town; we have been playing in this sandbox for years. What we have done for thousand's of dealers is enable them take care of the customer as priority # 1, ultimately reducing costs, waiting periods, ensure sufficient stock levels to enable quicker repair or replacement turnarounds.

Simply Warranty helps all OEM's and their respective distributors, suppliers, dealer / retailer network focus on increasing business opportunities as opposed to putting out fires. In short we make it easy for your company to grow!

Automating, enabling, consolidating through integration regardless of formats has become standard business practice. Effectively managing this process will improve communications and standardize workflow and policy.

Understanding, analyzing final products lifecycles will reduce failures and assist in corrective measures across all aspects of your business.

Keeping all members of your front line informed allows for corrective measures to be taken which ultimately assists in instantly addressing pro-active measures and emerging trends. Warding off recalls, which enhances the end users experience – bottom line makes all the difference.
